ABOUT EASY FLOW DRAINAGE

Founded in February 2014 by Geoff Williams, Easy Flow Drainage is your one stop shop for all your drainage needs. Having done over +40 projects over the years we have a no job too big or too small policy. We have come to specialise in commercial drainlaying projects and have worked closely the Earthquake Commission and the Christchurch City Council to rebuild Christchurch's drainage system.

A

Our Mission

To provide Canterbury with quality workmanship at an affordable price.

B

Our Values

Family business | Kiwi owned & operated
Experts in the field | Customer focused

...

Drain and Sewer Repairs

Our engineers are equipped to deal with all manner of repair scenarios. We identify problem areas and carry out excavations to repair drainage before returning your property to its original condition.

Drainlaying

Whether you are searching for residential or commercial drain-laying services our highly experienced team can understand, manage and deliver to your project needs on time and budget.

Drain Unblocking

When it comes to unblocking drains, we are the name you need to remember, as we have all the expertise and equipment necessary to solve all drain blockage issues.

CCTV Drainage Inspections Survey

Our CCTV Inspection Survey footage are applicable for council consents and involve a high-tech camera being placed into a pipeline, enabling us to inspect the interior condition of the drain.

Pipe Bursting

Worried about your garden being ruined by costly excavations? Using the pipe bursting method we can repair your broken drainage by inserting a new pipe through the existing one without digging up your property.

Vacuum Loading

Regular maintenance of your septic tanks, soak holes and pump chambers to ensure proper their proper function and hygiene. We use vacuum loading pressurised water to excavate and evacuate waste materials.

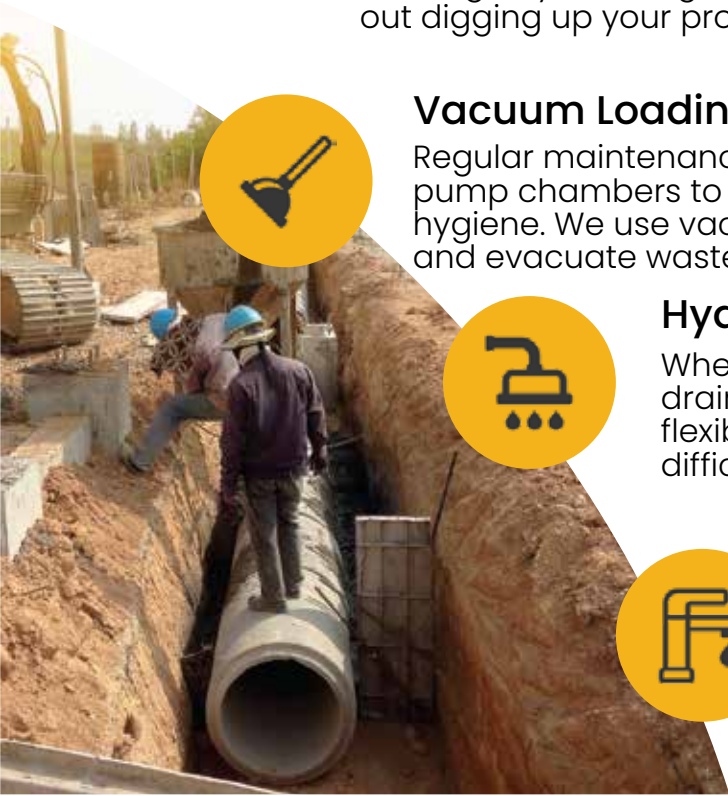

Hydro Jetting

When traditional rodding techniques fail to clean your drain we hydro jetting, which allows us to weave a flexible hose down the problem pipe and cut through difficult blockages with high pressure water.

Hydro Excavation

Safely expose existing services such as traffic lights, power poles, pilot holes for diggers, sewer lines, fiber-optic cables and power lines without damaging the service

OUR CERTIFICATIONS

Because of its high quality workmanship Easy Flow Drainage has been conducting Earthquake Commission work over the past 4 years to reinstate Christchurch's drainage system.

While conducting EQC work Easy Flow Drainage also became Christchurch City Council approved to conduct drainage work for the council.

Easy Flow Drainage is a certified drainlayer. All drainlaying work must comply with the Building Code so avoid the council penalties and make sure your work is done by a certified drainlayer.
